

Experiment 5

Aim 1: Write a javascript program to display your name, course, university and city.

Code :

```
<!DOCTYPE html>
<html>
<head>
<title>My Details</title>
</head>
<body>
<h2>Student Details</h2>
<p id="details"></p>
<script>
let name = "Aditya Wadhawan";
let course = "B.Tech CSE";
let university = "K.R. Mangalam University";
let city = "Delhi";
document.getElementById("details").innerHTML =
"Name: " + name + "<br>" +
"Course: " + course + "<br>" +
"University: " + university + "<br>" +
"City: " + city;
</script>
</body>
</html>
```

OUTPUT :

Student Details

Name: Aditya Wadhawan
Course: B.Tech CSE
University: K.R. Mangalam University
City: Delhi

Aim 2: Write a program to store length and breadth and calculate area.

Code

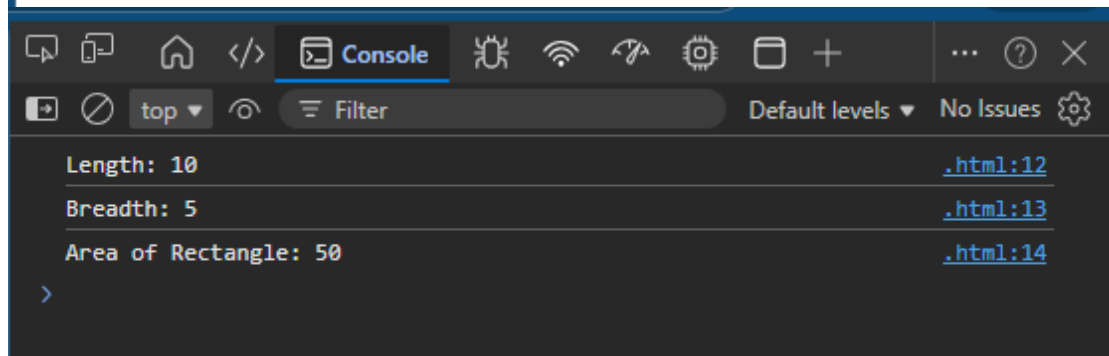

```
<!DOCTYPE html>
<html>
```

:

```
<head>
<title>Area of Rectangle</title>
</head>
<body>
<h2>Check Console for Area Output</h2>
<script>
var length = 10;
var breadth = 5;
var area = length * breadth;
console.log("Length: " + length);
console.log("Breadth: " + breadth);
console.log("Area of Rectangle: " + area);
</script>
</body>
</html>
<br>
<br>
<br>
```

OUTPUT :

Check Console for Area Output

Aim 3: Create variables to store name in string , age in int , is graduated of Boolean type. Print all details and display datatypes using type of.

Code :

```
<!DOCTYPE html>

<html>

<head>

    <title>Data Types Example</title>

</head>

<style>
    body {

        font-family: Arial, sans-serif;

        background: linear-gradient(135deg, #fff3e0, #e1f5fe);

        display: flex;

        justify-content: center;

        align-items: center;

        height: 100vh;
```

```
margin: 0;

}

.card {

background: white;

padding: 25px;

border-radius: 12px;

box-shadow: 0 4px 10px rgba(0, 0, 0, 0.2);

width: 280px;

text-align: center;

}

h2 {

color: #333;
```

```
margin-bottom: 10px;
```

```
}
```

```
.name {
```

```
font-size: 14px;
```

```
color: #777;
```

```
margin-bottom: 15px;
```

```
}
```

```
#output {
```

```
font-size: 16px;
```

```
color: #444;
```

```
line-height: 1.6;
```

```
}
```

```
</style>
```

```
</head>
```

```
<body>
```

```
<div class="card">
```

```
<h2>Student Details</h2>
```

```
<div class="name">Made by Aditya </div>
```

```
<p id="output"></p>
```

```
</div>
```

```
<script>
```

```
  let name = "Aditya";
```

```
  let age = 20;
```

```
  let isGraduated = false;
```

```

document.getElementById("output").innerHTML =

    "Name: " + name + " (Type: " + typeof name + ")<br>" +

    "Age: " + age + " (Type: " + typeof age + ")<br>" +

    "Graduated: " + isGraduated + " (Type: " + typeof isGraduated
+ ")";
</script>

</body>

</html>

```

OUTPUT :

Aim 4: Write a program to check whether number is even or odd.

Code :

```

<!DOCTYPE html>
<html>
<head>

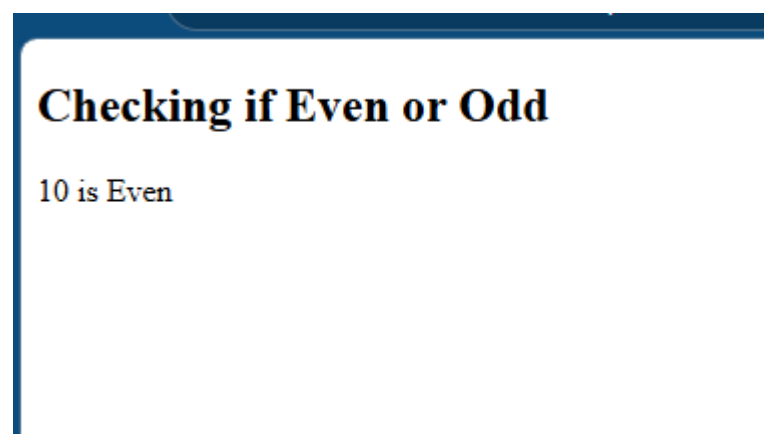

```

```

<title>Even or Odd</title>
</head>
<body>
<h2>Checking if Even or Odd</h2>
<script>
var num = 10;
if (num % 2 == 0) {
document.write(num + " is Even");
} else {
document.write(num + " is Odd");
}
</script>
</body>
</html>
<br>
<br>
<br>
<br>

```

OUTPUT :

Aim 5: Find largest of three numbers.

Code :

```

<!DOCTYPE html>
<html>
<head>
<title>Largest of Three Numbers</title>
</head>
<body>
<h2>Find Largest of Three Numbers</h2>
Enter First Number:
<input type="number" id="num1"><br><br>
Enter Second Number:
<input type="number" id="num2"><br><br>
Enter Third Number:
<input type="number" id="num3"><br><br>
<button onclick="findLargest()">Check Largest</button>
<p id="result"></p>

```

```
<script>
function findLargest() {
var n1 = Number(document.getElementById("num1").value);
var n2 = Number(document.getElementById("num2").value);
var n3 = Number(document.getElementById("num3").value);
var output = document.getElementById("result");
if (n1 >= n2 && n1 >= n3) {
output.innerHTML = n1 + " is the largest number";
}
else if (n2 >= n1 && n2 >= n3) {
output.innerHTML = n2 + " is the largest number";
}
else {
output.innerHTML = n3 + " is the largest number";
} }
</script>
</body>
</html>
<br>
```

OUTPUT :

Find Largest of Three Numbers

Enter First Number:

Enter Second Number:

Enter Third Number:

546465 is the largest number
